

What Can We Offer?

We offer a full range of services to support your business development and integrate new technologies. We offer all the services listed below, however we understand that some businesses only need specific help in areas. Computer & Information Systems Limited is a flexible partner and offer tailored solutions to fit your business requirements.

Why Choose Our Consultancy Package?

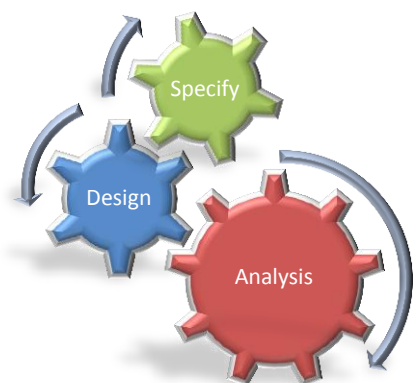

The first stage we offer is to develop a Business Improvement plan. This entails analysis of the existing systems, processes and infrastructure.

Computer & Information Systems Limited has many years of experience in full life cycle developments which will involve elements of analysis and design. As well as the manufacturing of software and systems, Luke Mills, the Director of Computer & Information Systems, has worked on many diverse projects, including working on national government software. This puts us in a great position to analyse and design solid systems for you to use that will improve your business processes.

We use this time wisely talking to you, understanding your business and communicating with you. By understanding your business we can integrate or develop systems that suit your needs.

This part is the most critical stage of any new system and we will work with you at your pace to ensure that we get this right first time. Correctly designed solutions will save you money by speeding up business processes and a solid plan will help avoid project failure by specifying specific sign off goals.

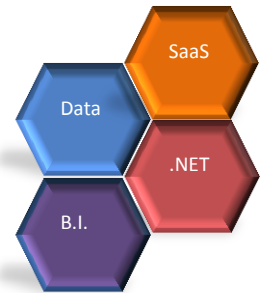

Why Choose Our Development Package?

Our primary purpose is to help you achieve the correct solutions engineered in the following areas;

- **Mobile Applications**
 - Integrate your business systems into your smartphones
- **Data Applications**
 - Data Warehousing
 - Data Systems
 - Business Intelligence
 - Reporting Systems
- **Windows Applications**
 - Windows Based Applications
- **Web Based Applications**
 - Software as a Service (SaaS)

Bespoke software can solve the problems that no off-the-shelf package can. Also it is inherently in a position to provide the optimum solution since it is designed for a specific company and a specific need.

Why Choose Our Support Package?

Computer systems should be to be maintained and updated to develop with your business and to support the expectation of the users. This support also covers enhancements of your product that are essential to ensure that you remain up to date.

At Computer & Information Systems we realise the importance of this and offer our clients a reliable long-term support service. In the long term, we will help you by looking at other aspects of your business to define enhancements for the future.

We guarantee customer satisfaction at each stage and professionalism in delivery.
